

We work with schools throughout Western Australia

We can work within:

- Education support schools and centres
- Mainstream schools
- Universities
- Tafes

We are committed to understanding your priorities and can offer a free initial consultation to discuss tailored supports to meet your needs.

Help your students communicate, participate and learn

Our speech pathologists and occupational therapists are respected for their experience, knowledge and skill working with the latest assistive technology and supporting communication in education.

Supporting education providers to incorporate Assistive technology (devices and equipment) can promote students' independence and success. We have experience working with students with a range of learning difficulties and disabilities, from kindergarten to higher education (universities and TAFE).

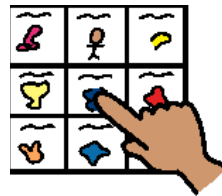

We aim to understand your organisation's current priorities, resources and skills to build a tailored support package to meet your needs.
