ILC Training - Consumers

Customised training for older people, individuals with disability, their families and carers

Workshop	Description and learning outcomes	Target audience
Scooter Safety Workshop	This workshop aims to increase safety and confidence of people who use scooters. The participant will learn what the current road rules are when driving a scooter, how to drive safely in all situations, maintenance and safety issues, and insurance. A practical component is also included where we take the scooter out and practice what has been learnt.	Consumers
Introduction to Scooters and Assessment	This workshop will provide an overview of the range of scooters and the various features available. The workshop will take you through things to consider when selecting a scooter; skills required to drive a scooter and basic training of the safe use of a scooter. This will involve a practical session on driving a scooter in the community.	Consumers Carers
Exploring Environmental Controls Units (ECUs) and Emerging Technologies	Topics examined in this workshop include what an Environmental Control (ECU) is and how it can be used to access a person's environment as well as an awareness of the range of ECU's available including smart technology. Participants will leave with an understanding of strategies to support someone to learn to use ECU's and further awareness about the latest emerging technologies and trends.	Organisations Consumers
Using Mobile Phones for Independence and Safety	This workshop will focus on increasing awareness of mobile phone applications and features which can be used to support life skills and personal safety and providing strategies which facilitate the implementation of mobile phone technology.	Consumers
Supporting Adults with Complex Communication Needs	This workshop will provide an awareness of communication, communication rights and the different ways people communicate. It will inform attendees of the range of communication aids that support and develop communication skills, how communication aids support participation and learning and strategies to support a person with complex communication needs. Upon completing the workshop the attendees will be able to demonstrate strategies for	Organisations Carers

	communicating with adults with complex communication needs.
