

Are you looking for information and advice about assistive technology (AT)?

Expert Assistive Technology (AT) Consultation Service

Through the ILC people with disability, together with their therapists, can access expert consultations about AT to support them to achieve their goals.

Through an Expert AT Consultation

- our experienced health professionals will provide impartial advice about the most suitable assistive technology options for each individual
- clients and their therapists are able to view and trial a range of assistive technology options at the one location, ensuring an efficient use of their time and NDIS plan funds (for those on an NDIS plan)
- individuals will have the confidence that their identified assistive technology solutions are the most suitable for their individual needs

A standard expert AT consultation ranges in time from one to two hours and includes an appointment with the relevant health professionals; access to a range of assistive technology options for viewing and trialling; advice on the most suitable options; and provision of supplier details.

Changes to how this service is charged

From 1 July 2019, in line with the rollout of the NDIS and funding changes within the disability sector, the way in which the cost of the Expert AT Consultation Service will be charged will change.

- From 1 July 2019, the cost for an expert AT consultation for NDIS participants will be \$190 per hour, in line with the NDIS allied health approved fees.
- People with disability who do not have an NDIS plan and are eligible for services from the Department of Communities, Disability Services can continue to access the Expert AT Consultation Service on a fee waived basis.

Did you know the ILC offers a range of services to support people with disability to achieve their goals?
